TECHNICAL SKILLS

Programming Languages: Python, JavaScript, OOPS

Front-End Frameworks: React.js/redux, NextJS, Angular/rxjs, Flask

Web Development: Node.js/Express js, microservice, ngnix, REST API, Langchain/LLM, AI-Model Train, vectorDb/Embedding

DataBase: SQL, MongoDB, Faiss

Core: DSA 500+ leetCode, low-level design, redis, kafka, rabitMQ, Communication-Protocal

EXPERIENCE

Socommerz Technologies ↗   July 2023 – April 2024
Software Engineer   *Gurgaon, Haryana*

Dollar General U.S

- Using AI we are able to solve this enterprise-level problem, **Copilot harnesses** the power of generative AI to source, summarize, and analyze data. **Track Plant management**, AI prediction for future insight.
- Led the development of an AI-powered SaaS application that **automates product generation** and generates blog metadata and descriptions. .

Multi-Vendor Saas Platform ↗

- Configured a comprehensive CMS for multi-vendor management, enabling seamless end-to-end operations.
- Implemented user domain configurations tailored for multi-vendor environments, ensuring efficient user management and experience.
- Developed and integrated a full-fledged e-commerce platform, providing robust features and functionalities.
- Designed and developed APIs for advanced report analysis, facilitating data-driven decision-making.
- Leveraged Redis for caching to optimize API performance and reduce response times.
- Created group indexing in MongoDB to optimize read operations based on various criteria, improving query performance and efficiency.

Techninza   Jan 2023 – July 2023
MERN developer   *Gurgaon, Haryana*

- E-Commerce - Reduce the manual efforts of the backend team by client-side data manipulation—payment gateway integration. **70% optimization** in search functionality and reduced API load
- war94 - Implement and Led the development of a social media platform similar to Instagram, emphasizing photo and video sharing, Features we build, Real-time chat one-to-one and many-to many, payment and perks module, life-cycle of creator, contest participating, and more .

PROJECTS

Shadow-ui-react ↗ | React, Rollup/webpacks, npm, TypeScript, primeReact   **Ongoing**
- Shadow-UI: Developed a npm library facilitating plug-and-play components for seamless integration into applications. Utilized **container component pattern** to ensure reusability and scalability, enhancing development efficiency. Managed component **npm registry** for easy discovery and usage, with default styles for consistent UI appearance. Demonstrated library capabilities through a comprehensive example application

Co-Pilot Bot ↗ | Flask, LLM/Langchain, Embedding model, vectorDB(Faiss)   **Ongoing**
- Introducing a versatile AI co-pilot that not only comes pre-loaded with a comprehensive knowledge base but also offers the flexibility to be trained with specific datasets tailored to your needs. Whether it's retaining **past interactions or absorbing new information**, our co-pilot seamlessly integrates both functions, ensuring accurate and **personalized** responses every time.

EDUCATION

DPG Degree College   2021 – 2023
*Master of Computer Application (M.C.A) - **CGPA - 7.66***   *Gurgaon , Haryana*

Dronacharya Govt College   2018 – 2021
*Bachelor Of Computer Application (B.C.A) - **CGPA - 6.63***   *Gurgaon, Haryana*
